Mr. Tackett Announces Registration Procedures

So that registration may be more efficiently handled, several new procedures will be inaugurated this year, Assistant Director W. Marshall Tackett has announced.

To make sure that registrants are in the right place, signing up for the courses which they need and which they are qualified to take, all will be required to present either a registration permit or a temporary admission form. Registration permits will be available for those who have applied for admission and have taken the placement tests and have been found properly qualified, temporary admission forms will be valid only when signed by Mr. Tackett, whose duties include those of registrar of the Calumet Center. Both forms will be secured at the first desk in the registration line on September 16, 17, and 18; at the end of the line they will be left with the cashier and will be forwarded to Lafayette.

So that faculty advisors may know the records of students they will advise during preregistration periods, arrangements have been made to photograph the permanent records which are kept at Lafayette. These photographs, when needed, will be supplied to advisors, who will then be better informed about the students they counsel. This procedure has been worked out with the help of Dr. Sharp and Dr. Wilson, who have been designated as the principal faculty advisors. Permanent record photographs for students in the academic programs will be available in time for preregistration for the second semester; those for students in the Technical Institute, it is expected, will be available by the summer of 1958.

Practical Nurses To Hold Seventh Graduation

The seventh graduation of practical nurses will be held Sunday, September 29, at 2:30 p.m. in the student lounge at the Calumet Center. Twenty-five graduates will receive their certificates in practical nursing from Prof. M. D. Adams, culminating their year's training in nursing skills. These certificates entitle the graduates to take the Indiana State Board licensing examinations, which will be held in Indianapolis on October 30. Upon passing these examinations, the graduates will be licensed practical nurses, and will use the initials L.P.N. after their names.

The graduates started their training at the Purdue Calumet Center in September, 1956. The first four months of the course consisted of intensive classroom instruction at the Center. The students received instruction in Nursing Arts, Family Living and Nutrition, Body Structure, Personal Hygiene, and Professional and Vocational Relationships. This part of the course is taught by Miss Mary Ruth Maginsky, R.N., Mrs. Dorothy Clayton, R.N., and Mrs. Joan Doyle.

Following this preclinical period, the students received eight months of clinical experience in the four major hospitals serving the community around the Center. Each student spent two months at each hospital, receiving experience and instruction in Medical Nursing at Methodist Hospital in Gary, in Surgical Nursing at St. Catherine's Hospital in East Chicago, in Pediatrics and Long Term Illness Nur-

ATTRACTIVE CAMPUS surrounds Purdue University Calumet Center

Student Council Announces Dates For Fall Elections

The Interim Committee of the Student Council announces that elections for office in the Student Council will be held Thursday and Friday, October 17 and 18.

The student body, as a whole, will elect the secretary and the treasurer of the Student Council. The freshmen and sophomores will elect four representatives each. The Technical Institute will elect three representatives. The part-time students will elect one candidate. The ballots for freshmen will contain only the names of the freshman representatives, the secretary and the treasurer. The same will hold true for the sophomore, the Technical Institute, and part-time-ballot.

A voting table, ballots and a ballot box will be set up in the Student Lounge on these days. Students who are not candidates for office will be in attendance under the supervision of the Interim Committee and faculty sponsors.

There will be a meeting on Wednesday noon in Room 5 on October 2 with all who are interested in being candidates. Mrs. Cone, Faculty sponsor of the Student Council, or Phil Szpiech, President of the Council, will be glad to give further information.

Mixer Planned For New Students

There will be a mixer for new students on September 21 from 8 to 11 p.m. in the Student Lounge. There will be dancing, games and refreshments. Phil Szpiech, President of the Student Council, and Bob Foster, Social Chairman, will act as co-chairmen, assisted by all the returning students.

The mixer will be sponsored by the Student Council and will be free. This is not a couple affair and will be strictly informal. Come meet the old and welcome the new students!

Physics-Mathematics Department Secures Two New Instructors

Mr. Carl B. Lemkuhl will join the Calumet Center staff this fall as a teacher in the field of physics-mathematics. Mr. Lemkuhl, a former graduate of Tolleston High School, Gary, Indiana, majored in physics, mathematics, and chemistry at Indiana University, receiving his bachelor of science degree in June, 1953, and his master's degree in June, 1956. Before beginning his university studies, he served in the U. S. Navy for thirty-nine months. He is married and has two children—a girl four and a boy two years old. His non-academic interests include hunting, fishing, and "do-it-yourself" projects. He is enthusiastic about becoming a part of the Calumet Center faculty.

Also coming to the physics-mathematics staff is Miss Natalie A. Schneider of Indianapolis, Indiana. Miss Schneider received her BS degree in mathematics at Purdue University in 1956. She has done much course work in mathematics, physics, statistical methods, and mathematical statistics. While at Purdue she served as a graduate assistant in teaching and in basic metallurgical research. In 1953 and 1954 she was employed by Merad Laboratories, Inc., a firm of engineering consultants. She will reside at 5946 Hohman Avenue, Hammond.

Supervisor's Program Enjoys Rapid Growth

Supervisory and staff management men in the Calumet Area have found the Professional Foremanship Program offered by the Purdue University-Calumet Center to be a very practical and helpful activity. This twenty-four semester hour Technical Institute credit program was designed in cooperation with practical top management representatives to meet specific needs of foremen and staff supervisors. It is operated in cooperation with the American Society of Professional Foremen, and graduates of the program affiliate with that organization.

RETired ARMY OFFICER WILL TEACH MATH

Mr. Dale R. French is a new member of the mathematics department faculty. He was also a member of the first class to take the course of instruction set up by Purdue University to prepare retired personnel for instructing in the field of mathematics.

Mr. French was born in Portland, Oregon, in 1904. He graduated from Santa Rosa High School, Santa Rosa, California; he thereafter attended the U. S. Military Academy, West Point, graduating in 1929 with a BS degree. He then served in the Army in the commissioned ranks for twenty-seven years, holding a wide variety of command and staff positions, primarily concerned with the field of logistics, and retired from the Army in 1956 in the grade of Lt.-Colonel. He served as Quartermaster of the 85th Infantry Division in Italy during World War II, and was with the Eighth Army Headquarters in Korea during the early part of that action. Medals received during his war service include the Legion of Merit, Bronze Star with palm, Purple Heart, and Commendation Ribbon.

Mr. French has recently completed the work for his MS degree, having done graduate work at Purdue University in 1956 and 1957. He is married to the former Miss Elizabeth Kimball of Jamestown, New York. They have three boys, now grown up. "The Army and matrimony," he says, "have done an excellent job of scattering them well over the world." The Frenches will reside at 1539 River Drive North, in Hammond.

Enrollment in the Professional Foremanship program has grown by leaps and bounds. Many of the graduates of this program continue on in the Technical Institute and complete requirements for one of the standard Technology certificates.

ARMORY BUILDING awaits new year of Purdue activities.

Mr. Gyte, Center Director, Welcomes Students to PUCC

The administrative and instructional staff of the Purdue Calumet Center extends a sincere welcome to the new students entering an educational program here this fall. It is our hope that you will have an enjoyable and profitable time during your stay at the Center.

You will encounter problems during your school life—especially during the first few weeks or months. We ask you to bring these problems to your instructors or advisers early, so that they may be solved. They will not solve them for you, but will help you if you but ask them. Solved problems will make your school life go more smoothly.

You will be assigned to an adviser when you register. Remember who this is, and when you need help, look him or her up.

The Center maintains a testing center for enrolled students. It is possible that you may be able to get help here also. Mr. Walter Hartmann will be available for testing services if you should feel your need for this service.

Purdue Calumet Center has come to be a sizeable operation over the past fifteen years. Many students are working together with a teaching staff. Where there is a group working together for a common cause, there is need for regulations. We have had such a need and have, by the help of Student Senate and faculty, developed a Students' Handbook for your guidance and help. Please read this and do your best to cooperate in observance of all regulations. This will lead to a smoothly operating school, and it will make your work here more enjoyable.

May we again welcome you and wish you the best in your year's work.

Psychologist Joins Purdue Center Instructional Staff

Walter Hartmann, an experienced psychologist, will join the staff of Purdue University Calumet Center before the fall semester begins on September 19. He is to serve as instructor of psychology.

Mr. Hartman, who is to receive the doctor's degree in psychology from the University of Chicago this fall, is a former head of the psychology department at the Illinois State Hospital, where his responsibilities include testing, evaluation and diagnosis; therapy, supervision of the intern training program; and public education. He also served as consultant to the Child Guidance Clinic.

Born in Germany in 1922, he attended the humanistic "Gymnasium" and thereafter went to England as a refugee, remaining there from 1939 to 1946. He studied at Technical College, England, and taught in several preparatory schools, including the Oxford Academy. He entered the United States in 1946 and became an American citizen in 1953. After teaching and counseling for two years at a private boarding school in New Jersey, he came to the University of Chicago, where he served from 1948 to 1950 on the Committee on Human Development and followed a program of study in the field of psychology. The following year he assumed his duties as psychology department head at the Illinois State Hospital. From 1951 to 1953 Mr. Hartman was a research associate at the University of Illinois. There he made a special study of (Continued on Page 3)

WHODUNIT?

When you entered the lounge for the first time this year you were sure to have noticed the clean floors and tables. But if the students of this year act like students of last year, our lounge will soon be an unsightly mess. Isn't it a shame that adult (or supposedly adult) college students are incapable of behaving themselves? In the past the combined efforts of the Student Council and the Boilermaker have failed to maintain a clean lounge. Instead of trying to set good examples, many of the members of these organizations have shown their poor etiquette by crushing cigarette butts on the floor, leaving pop bottles and milk cartons on the tables, and throwing lunch bags at one another. But this is no excuse for negligence on the part of other students. Why, high school students have more respect for school property than we have. Do we need police action to keep our lounge clean or must we be forbidden to smoke, have soft drinks, or eat our lunches there? It's about time we made our decision—are we adults or are we children?

BEGINNING FRESHMEN

You have now reached the turning point in your education. You have just left high school, where the classes were easy, the homework light, and the instructors interested in the individual student. You have been forewarned about the problems and difficulties to be encountered in college. Heed this advice, for although the classes may seem easy at first, they will soon become extremely difficult. Keeping up with your class is difficult enough; catching up is virtually impossible. Remember! One-third of all freshmen never reach the sophomore level.

In order to have a well-rounded background, you must neither devote all your time to activities and none to homework, nor must you study constantly and have no activities. Here at the Center there are only a few activities, but they are all worthwhile. Coach Hayes will soon be looking for basketball players to fill this year's basketball squad. Doc Schlosser, faculty advisor of the Circle K Club (a division of Kiwanis International), is now forming this year's service club. The Student Council elections will be held soon. Last but not least is the Calumet Boilermaker; staff and reporting positions are still open. Choose your activity wisely; do a good job; and the rewards will be high.

Y'ALL COME

Let's get this school year off to a good start. The Student Council has a social committee that is always planning a dance, hay-ride, or some other non-academic event. The students who have attended these affairs have always had a good time, and there has not been any strain on the pocketbook. If the attendance at these affairs is not satisfactory, they will cease to be held, so let's all be sure to be present for the first event and we'll all be at the following events.

FACULTY NOTES FROM ALL OVER

A faculty member was recently asked to write three articles for the Boilermaker. Busy for five seconds, she finally submitted the result: a small piece of paper displaying the words "a," "an," and "the." We promise not to reveal the name of this person, who teaches English and whose office is in Room 101.

We found Mrs. Schmid busily mimeographing course outlines the other day. She says she is looking forward to another year in the bookstore. We recall that the second-hand book sales last semester attracted many people, produced many satisfied customers.

Mr. Dwyer did some reading this summer—very extensive and very enjoyable. Between chapters he visited friends in the East.

We understand that Dr. Tuckey has won himself a color television set as a result of having submitted several names for the two most recent Borden calves. Rumor has it that he will give one free showing, then start charging admission.

The faculty breakfast September 4th was a definite success. Amid tales of the big one (fish) that got away and of the big one (book)

that didn't get finished, the breakfast made a relaxed, delightful beginning for the new year. Mr. Tackett consumed two or three "Tackett Specials" in preparation for what proved to be his clear, detailed explanation of this year's registration procedure.

There will be many changes in office assignments this year. Desks will get wheeled or shoved through the halls, faculty members and students will get more confused than usual, and the offices, despite all this sleight of hand, will get more crowded.

Mr. Giese tells us that the power of television station WTTW has been substantially increased. If you can't bring in Channel 11, throw your set away.

If you see a motley little beagle with big doleful eyes, and ears like car shammies, send him home to Mr. Tinkham. He (the dog) has been missing for some time, and has still to chew up two or three of Mr. T.'s ties. (So that's what's the matter with them.)

Coach Hayes was asked to make some predictions for the coming basketball season. He did not commit himself definitely, but the Boilermaker is saving space for headlines like "CENTER HOOPSTERS WIN EIGHTH IN ROW IN EXCITING GAME." This paper has no space for "PUCC LOSES."

Two New Teachers Added to Staff of Chemistry Dept.

Two new chemistry teachers have been assigned to the Calumet Center by Purdue University; the new faculty members will join the Purdue staff in Hammond previous to the opening of the fall semester. Milton Yusem, who has had considerable experience both in teaching and in industry, will hold the rank of assistant professor. He attended Central College in New York and received the A.B. degree from the University of Alabama at Tuscaloosa. After completing research in organic chemistry, he was granted the doctor of philosophy degree by Massachusetts Institute of Technology.

At Brooklyn College, Professor Yusem was assistant professor of general chemistry and of the physical chemistry laboratory. Subsequently, he taught at Clarkson College of Technology for two years, where he was assistant professor of physical and organic chemistry. Among the courses he taught at Clarkson were mechanism of organic reactions, polymer chemistry, kinetics, thermodynamics, organic chemistry, and quantitative analysis.

From 1951 until June of this year, Professor Yusem has been engaged in research for the Westinghouse Electric Company and the Bradley-Vroman Company, where he worked on silicone research in the synthesis of an antimalarial and on elasticity and creep as related to polymers. Professor Yusem is a member of the American Chemical Society.

William E. Baiblinger is the other new member of the chemistry staff at the Calumet Center, where he will be an instructor this fall. He graduated from Marietta College, Marietta, Ohio, receiving the B.S. degree. Since September, 1955, he has been a graduate teaching assistant on the Purdue Campus at Lafayette, majoring in Physical Chemistry. During the summers of 1954 and 1955 he did research for the National Carbon Research Laboratory at Cleveland, Ohio, which included work on the solid state in physics and semi-conductors.

T.I. Program Undergoes Close Study

During the past few months the curriculum for the Chemical and Metallurgical Technology program has been undergoing an extensive study. The purpose of the study is to incorporate desirable changes to keep the program up to date with a rapidly changing industrial situation.

A committee of Purdue staff members, and a selected group of graduates and other personnel from industry, have been working on the study. Those from Purdue include M. E. Gyte, Calumet Center Director, Richard J. Combs, Calumet Center Assistant Director, Professor M. D. Adams, Acting Head of Purdue Technical Institute, and Professors F. F. Schlosser and W. E. Crane of the Calumet Center staff.

Those from industry who are participating in the study include Harold Pratt, Training Director; Joseph Buchvitz, of American Steel Foundries; Gene Royse, Manager, U. S. Reduction; J. Gergacz, Youngstown Sheet and Tube Co., and Bill Gillian, of the Standard Oil Co. of Whiting.

Steps taken thus far include a questionnaire which was sent to all graduates of the program, seeking information on how well they were prepared for their positions in industry. A follow-up questionnaire to supervisory employers of graduates was sent out for the purpose of obtaining an evaluation by the employer of the graduates' performance on the job.

A meeting is planned for the near future for the purpose of analyzing the data accumulated thus far, and to plan future activities for the completion of the study.

Civil Technology Program Meets Urgent Needs

Civil Technology, the newest two-year program to be added to the curriculum of Purdue University's Technical Institute, is now entering its second year. The program is offered in all of Purdue's four Technical Extension Centers, including the Calumet Center, and has been developed to relieve a desperate need for trained technicians, especially in the field of highway construction. Due to increased highway development throughout the country during the past few years, trained personnel are urgently needed.

The program of study has, however, been designed to prepare students to take employment in other fields of civil engineering technology as well, such as land surveying.

Emphasis in the second-year courses is placed upon the technician's part in surveying, highway layouts, steel and concrete construction, structural drafting, and sampling and testing procedures.

Graduates of the Civil Technology program are eligible to accept positions in the office of a city engineer or as a professional engineer, or as technicians working with topographers. They may also find positions in steel and concrete surveys, highway layouts, traverse and level parties. Their services are needed by private construction companies and consulting engineering firms.

Here's Opportunity for Business Experience On Boilermaker Staff

Many challenging opportunities for practical business experience are afforded students who will be active on the business staff of the Boilermaker. Vacancies due to students going to the main Campus include the position of Advertising Manager and several Advertising Representative openings. Appointments to more demanding positions have left openings in clerical, ad lay-out, ad copy, and similar spots.

Applicants for bookkeeper and the key position of treasurer are being solicited and screened. Appointments to these spots must be made at an early date.

Students interested in training and experience in any of these practical fields are urged to contact Prof. John T. Malone, faculty adviser to the Boilermaker Business Staff, and get their applications on file at the earliest possible date.

Beef 'n' Corn

Mr. Gyte: "I have a report here that says coke, soda, and whiskey were found in your room. What do you make of that?"

Bob Foster: "Highballs, sir!"

Last week Mr. Cloghessy went to the second hand store to buy one for his watch.

Darlene Dibblee recently wrote to a newspaper etiquette columnist: "I stayed out till two o'clock the other night. My mother objects. Did I do wrong?"

Her reply was: "Can't you remember?"

If all the cars in the United States were placed end to end Jim Hoffman would be sure to pull out and try to pass them.

Purdue Calumet Center Faculty Holds Opening Meeting For New Term

The first fall meeting of the faculty of Purdue University Calumet Center was held on Wednesday, September 4.—Forty-four full-time staff members were present. The meeting began at 8:30 a.m. with a breakfast in the cafeteria. The breakfast "get-together," a new feature this year, was considered highly successful; it provided an opportunity to become acquainted with new faculty members and to discuss the past summer's activities. It appeared that during the vacation period many of the staff had ranged far and wide.

At 9:30 Mr. Gyte, director of the center, opened the formal meeting of the general faculty committee in Room 27. Seven new staff members were presented and welcomed.

Mr. Tackett, assistant director and registrar, explained the new registration procedures. Beginning this fall, he said, registering students will be required to fill out preliminary enrollment cards for each class, in addition to the regular registration cards which will still be used. The preliminary enrollment cards will make it possible to avoid overfilling of class sections.

Mr. Combs, assistant director in charge of registration for Technical Institute courses, said registration procedures for TI students will parallel those for students in the academic programs.

Dr. Sharp and Mr. Malone were elected to serve for three years on the Advisory Committee, which is the executive committee of the Calumet Center Faculty. They will replace Prof. Schlosser and Dr. Tuckey, whose terms expire this year. Mr. Relich was elected to fill the remaining one year of the unexpired term of Dr. Kir-Stimon, who has resigned from the faculty of the Center.

Mr. Gyte appointed a special committee of graduate studies, naming Drs. Giese, Cone, Sharp, and Wilson as members of the committee. This group will develop information concerning those areas in which it may be desirable to set up regular programs of study leading to advanced degrees.

Mr. Gyte also announced that Purdue Calumet Center will, later in the school year, sponsor a regional science fair for the Lake County area. The fair will be held in the recently completed Armory Building on 173rd Street.

Advanced Motion and Time Study Offered

A special class in Advanced Motion and Time Study will be offered this semester at the Purdue Calumet Center, in answer to many requests throughout the Calumet region.

The course offers study and laboratory practice in advanced techniques of work analysis and work measurement; it has been designed to meet the advanced needs of practicing time study men and junior industrial engineers.

Seven systems of predetermined time standards will be studied. Therblig motion picture analysis of jobs together with standardized rating procedures will be used to study, analyze, and compare the various predetermined time systems. The course will also cover comparisons between, the evaluation of, and practice in the use of stop watch study, predetermined time standards, standard data, and work sampling.

Advanced Motion and Time Study is a graduate level course which Technical Institute graduates and college trained personnel are eligible to take.

MUNSTER BRANCH—717 Ridge Road, Munster, Ind.

You Are Important To the Boilermaker

This issue of the Calumet Boilermaker—Volume 5, No. 1—is the first of nine issues that will appear monthly during the school year that lies just ahead. The Boilermaker is a student newspaper, published by the students of Purdue Calumet Center. Those who may want to become a part of the student staff are invited to make their interest known as soon as possible. Past experience is not as important as a willingness to learn, to work, and to cooperate with others. The Boilermaker can use many talents; it wants help in all of its departments. In return, it offers the opportunity to gain journalistic experience that will be valuable in many ways.

The newspaper organization includes several working groups or departments, each having its specific duties and working under the guidance of a faculty advisor. The reporting and editing department handles newsgathering, features, and editorials; Mr. Tinkham is the advisor. The copy department, with Mrs. Gemberling as advisor, does typing and rewriting of copy. The photography department, advised by Mr. Gerick, takes most of the pictures used in the paper and processes them in the Center's developing room. The business department solicits advertising copy, handles the business correspondence of the newspaper, and does the accounting work; Mr. Malone is faculty advisor for the business department. Miss Stark is advisor for proofreading. Dr. Tuckey is a general advisor and is chairman of the Student Publications Committee, a faculty subcommittee of the Student Affairs Committee.

Many new student staff members are needed to fill the positions in these various departments. Even the editorship of the paper is open: James Hoffman, last year's editor, has again served in that capacity for this first issue and will so serve until the new staff can be formed; however, other commitments prevent his continuing as editor after that time. And in all departments the door is open to those who are ready to give their time and effort to putting out the Boilermaker. Temporary assignments to positions will be made by the advisors for the October and November issues. After this "try out" period, regular staff positions for the rest of the year will be designated.

T.I. GRADUATES ARE HONORED AT BANQUET

The 1957 graduates of Purdue Calumet Center's Technical Institute were honored at a banquet Saturday evening, May 25, in the Center's student lounge. Nearly 100 people attended this annual affair which is sponsored by the Technical Institute Alumni.

Mr. William Soudrette, Plant Manager of the Cities Service Oil Company, addressed the group. Mr. Soudrette discussed the technician's role in industry. The 1957 graduates were introduced by Mr. M. E. Gyte, Center Director. Comments were added by Prof. M. D. Adams, Acting Head of the Technical Institute in Lafayette. Mr. Adams also paid tribute to the late Prof. Von Roy Daugherty, former head of the Technical Institute, and Prof. Harold Williamson of the Calumet Center staff. The invocation was given by Rev. Everett Eggleston. Mr. Elmer Boyens, International Harvester Company, a former graduate, was toastmaster for the affair.

As a part of the program for the evening, the graduates and alumni toured the building with their families and examined a display of model homes exhibited by Prof. Charles Hutton of the Building Construction Technology.

Center Students Receive Scholarships

Two students planning to attend Purdue Calumet Center have been awarded the Hammond Optimist Club scholarships. The \$100.00 per semester scholarships were awarded to Karen Daniel and Mike Matthew Kuchae, both of Hammond. The scholarships are renewable at the end of each semester providing the students have maintained a 4.5 average index.

Miss Daniel, 18, of 6732 Forestdale, is a graduate of Morton High School and is planning to study liberal arts. Mr. Kuchae, 18, of 938 Eaton Street, Hammond, is a graduate of Hammond High School and has been admitted to the school of engineering. Both are planning to enroll in the fall semester classes at Calumet Center.

The Hammond Optimist Club scholarship fund was provided in the spring of 1956, in a program with the Purdue Glee Club from which the net proceeds were turned over to the Purdue Calumet scholarship fund.

MRS. GEORGE MACY
IS NEW LIBRARIAN

Mrs. George Macy, the librarian at Calumet Center, will be glad to help any student who has questions about the use of the library. Mrs. Macy is a newcomer to the staff this fall. She is succeeding Mrs. Marguerite Williamson, who is leaving to teach English and reading at Morton High School.

The library is located on the first floor next to the main office. It has a selection of reference works, periodicals, fiction, and non-fiction in addition to study space.

The Reader's Guide is valuable in locating information about magazine articles. If you want to discover a book about a certain subject, you can check the card catalogue. Your college career can run more smoothly if you learn to use these aids as soon as possible.

Psychologist . . .

(Continued from Page 1)
the relation of social perception to group effectiveness, and also taught graduate classes in education and psychology.

For the past three years Mr. Hartman has been educational director of Reform Jewish congregations, Washington, D.C. and St. Louis, and has been active in adult education, curriculum development, teacher training, youth group work and counseling. He is the author of various articles and studies in the field of psychology. At present he resides in Hammond with his wife, whom he met in England, and two daughters, aged two and five.

Can you answer these questions?

1. Who was John Purdue?
2. What is the origin of "Boilermaker" as applied to a Purdue student? Was the term meant to be complimentary?

Purdue Club Elects Officers, Plans Activities

The Purdue Club of Lake County held its annual spring banquet on May 26, 1957. A crowd of over one hundred alumni and interested people gathered to make this annual affair a huge success.

Dr. Donald R. Mallett, Purdue's executive dean, addressed the group. Other guests from the Lafayette campus included Roy Eddy, head basketball coach, Bob DeMoss, assistant football coach, and Joe Rudolf, executive secretary of the Purdue Alumni Association. Mr. Rudolf acted as master of ceremonies.

Outgoing President, Steve Kristovich, conducted a short business meeting in which a new slate of officers was elected. Jim Snook, a 1946 graduate of Purdue, was elected president. The remaining new officers are as follows: Vice-president, Bob Steiger; Secretary, Lou Karras; and Treasurer, Steve Menich.

A meeting of the new officers and a small group of interested members was held on August 26 for the purpose of planning the 1957-58 activities for the Club. Several ideas were discussed, and tentative plans were laid for a get-together late in October. Films of the September 28 Purdue-Notre Dame game will be shown as a

FACULTY EATS FOR FIRST TIME SINCE SPRING

The faculty of Purdue Calumet Center began the year with a breakfast preceding its first meeting on Wednesday, September 4. The breakfast was held to enable the faculty to welcome new members as well as to provide an opportunity to chat about vacation experiences.

The menu consisted of two "specials." The "Professor's Special" at only 37c included two country-fresh eggs, toast done to order, and coffee. The "Tackett Special" (for light eaters) was also a bargain at 29c with orange juice, a choice from a variety of sweet rolls, and coffee.

The Faculty Affairs Steering Committee has planned four other functions which will take place during the school year. They will include a "Get Acquainted" party in October, a Christmas party in December, a second semester "Kick-off" party in February, and a spring party in May.

feature of the October event. More complete information on this and other activities of the Purdue Club will appear in the mid-October issue of the Boilermaker.

"Calumet," found in the expression "Calumet region," signifies the peace pipe used by the North American Indians.

Placement Tests Help Freshmen Discover and Overcome Deficiencies

The final placement testing program, prior to the start of the fall semester, was held on Saturday, Sept. 7, at 8:30 a.m. and 6 p.m. In order that all students who are planning to attend Calumet Center this fall might be able to participate in the testing program, two sessions were scheduled for Saturday, September 7. Applicants for admission who were forced to work on Saturdays were thus able to take the placement test at 6 p.m. on Saturday.

The regulation that all beginning students must take the placement exam applies to all beginners, both in the degree and technical institute program.

The purpose of the orientation exam is to determine academic weaknesses of students planning to enter the college or the Technical Institute in September. Students who are deficient in mathematics, chemistry or English, may take steps to remove the deficiency before the fall term. The exam is made up of six parts, including algebra, trigonometry, chemistry, English composition, and physical science. Students who took the placement exam on Sept. 7 will be informed prior to the beginning of the fall session on Sept. 19 whether or not they are deficient in any of the above-mentioned areas.

Special classes have been scheduled for applicants for the degree program who have deficiencies for college entrance. Basic courses in chemistry, algebra, trigonometry, and English have been scheduled for students who have not had any of these courses or for students who are weak in these areas. A student may remove deficiencies by attending these classes as a regularly enrolled full-time student or as a part-time student in the evening program. Both day and evening classes have been scheduled and are available to any graduating high school senior.

Student Suggestions Are Aid to Success

This article is written for those new students who may feel in the dark about the activities going on at the Center.

At Purdue there are countless activities going on constantly. These activities, such as dances and basketball games, are advertised on the bulletin board on the north wall of the lounge. Also on this bulletin board is placed the general gossip of the school, which is believed to be interesting and entertaining to everyone.

Then there is the Student Council, which is composed of students of the Center. It arranges all dances, parties, and assemblies; it is open to all those interested.

If one needs help in any way, many persons will be only too glad to assist him. It is believed that if all will participate in student activities, their stay at Purdue will be much more enjoyed, and they will become better known by their teachers and friends.

Campus Football Schedule Revealed

Student passes enabling center students to attend campus football games will soon be made available through the cashier's office. The fee for students is \$5.00. This fee entitles students to attend all the home games. The students will sit in the student section at Ross-Ade Stadium.

The football schedule is as follows:

Home Games
 September 28—Notre Dame
 October 12—Wisconsin
 October 26—Miami (Ohio)
 November 16—Northwestern
Games Away
 October 5—Minnesota
 October 19—Michigan State
 November 2—Illinois
 November 9—Ohio State
 November 23—Indiana

Be sure to reserve a ticket by taking your number three registration card to the cashier.

Hayes Announces Center Basketball Schedule

open to women who have had two or more years of high school education or its equivalent as determined by test, who are between the ages of 17 and 55, who are physically fit and who possess desirable personality traits. The licensed practical nurse works under the orders of a physician or the supervision of a registered nurse, and may work in hospitals, nursing homes, or doctor's offices, or may provide nursing service to patients in private homes.

Classes are admitted three times a year: in September, January and April. The tenth class to be admitted to this program at the Center will begin their studies on September 16. Advance registrations indicate that this class will be near the capacity of 40 students.
